

Levelling Up: Online tutoring and mentoring in Mathematics, Physics and Chemistry

If you are in Year 12 and are interested in studying mathematics, physics, chemistry, materials science or a related subject at degree level then you are invited to apply for our *free* programme of online tutorials and support called 'Levelling Up'. You can choose one of these subjects in which to receive tutoring and this should be the main subject you think you will apply to university to study.

Key Benefits for Participants

- This programme will support you to achieve the grades you need to study maths, physics, chemistry or materials science courses at university.
- You will meet university students at the University of Birmingham to get a taste of what to expect from studying at degree level.
- You will receive help and advice to support your UCAS application for maths, physics, chemistry or materials science.

What is involved?

Weekly 1 hour Zoom call on Wednesdays at 6pm in school term time between April 2022 and Spring 2023. The sessions are in small groups and led by trained, current undergraduate or post-graduate students. Self-study materials are provided for you to work through in between sessions.. There is a 3 weekly cycle of activity:

Week 1 – Independent Learning

Working on questions and problems, on a specific curriculum theme in your chosen subject.

Week 2 – Online Tutorial

Work with a tutor in a small group to build on the independent learning

Week 3 – Mentoring

Discuss issues relating to university application in your chosen subject.

Am I eligible?

We have a limited number of places available and for this program we prioritise applicants from under-represented groups in higher education. Full details of eligibility and more information about Levelling Up can be found on our website here:
