

Transition Work: Science

Myself and my science team are very much looking forward to meeting you in September. As we aren't able to host you for an induction session in Science, we thought we'd give you a little task to do over the summer - those Bunsen burners will just have to wait!

Miss Gospel, Head of Science

Your task is to make a 3D structure of **one** of the following:

The solar system

If you need some information to help you, you might find the following link to BBC bitesize useful: <https://www.bbc.co.uk/bitesize/topics/zgwxfg8/articles/z7cg47h>

A plant cell

If you need some information to help you, you might find the following link to BBC bitesize useful: <https://www.bbc.co.uk/bitesize/topics/znyycdm/articles/zr69dxs>

Solids, liquids and gases

If you need some information to help you, you might find the following link to BBC bitesize useful: <https://www.bbc.co.uk/bitesize/topics/z9r4jxs/articles/zqpv7p3>

Guidelines

- Your model should fit comfortably on sheet of A4 paper (or be no bigger than a shoe box)
- You may include an additional sheet of scientific information if you wish, this should be no more than one side of A4 and is optional
- You can make it out of any material that you like, we are not yet sure when the judging will be - we'll let you know in September. Please make sure that if your model is made of something perishable that you don't make it too early, we'd hate it to go off!
